World of Light

Space glows like a firefly.
Sparkling stars shine and traverse
through the tender universe.
It is a painting that can just hypnotize you.
    Reach for stars.
    Space is infinite.
The moon lights up like a lamp
Its pure white gleams blinds you.
    Space is breathtaking as the
Milky Way leaves you with a face of surprise.
Sometimes, when you feel melancholy,
    all you have to do is look
at the colors around you.
